For Safety, Health, and Comfort. Affordability, too.

Roofing, Building Envelope + Construction Services

Cooperative Contracts

TRUST IN EXPERIENCE. STRENGTH IN NUMBERS.

The image shows the exterior of a modern building with a prominent sign that reads "COMMUNITY COLLEGE". The building features a series of vertical columns and horizontal louvers above the windows. The sky is blue with some light clouds. A blue banner with the word "Total" is visible in the lower right corner of the image.

- ③ **The Power Couple: Tremco Roofing and WTI**
As a manufacturer of roofing materials since 1928, Tremco Roofing and Building Maintenance offers a breadth and depth of roofing systems for every environment, and the technical know-how to solve our customers' biggest problems. And because our affiliated construction services company WTI* offers turnkey maintenance, repair, roof management and general contracting services for the entire building envelope, we have the unique ability to provide a total solution to maximize building performance and our customers' return on investment.

*Tremco Roofing and WTI are part of Tremco Construction Products Group.

The E&I Procurement Solution: Speed. Quality. Compliance.

You've got a roofing or building envelope problem. You've defined the solution with the help of Tremco Roofing and WTI. Now it's time to procure products and services as quickly and economically as possible, without sacrificing quality, performance or transparency. That's where the **E&I Cooperative Services Contract (#EI00059~2021MA)** comes in.

E&I helps its more than 5,500 member institutions optimize supply chain efficiencies through access to a diverse portfolio of competitively awarded contracts. Their competitive solicitation process has been validated by the National Institute of Governmental Purchasing (NIGP) as complying with generally accepted procurement standards.

Tremco and WTI are proud to have been the national contract holder for roofing and related services since 2011. The expansive contract for roofing systems, exterior building maintenance, products, labor, supplies and related services includes all aspects of building weatherization, facade restoration and cladding, window replacement, air barrier sealing, building ventilation system cleaning and sanitizing, asphalt paving, flooring, and parking garage restoration.

What's more, the E&I contract meets Uniform Guidance 2 CFR 200/EDGAR requirements for use of emergency federal funds such as ESSER and HEERF, for facility repairs to improve indoor air quality. Roofing and building envelope continuity, HVAC disinfection and moisture management play a crucial role in indoor air quality and ensuring a dry, comfortable, healthy, and safe environment for learning.

solutions from a single source

Why Use A Cooperative Contract?

IT'S COMPETITIVE All work is publicly and competitively bid in accordance with generally accepted procurement standards across the nation. E&I's collaborative purchasing expertise helps ensure compliance and transparency.

IT'S EXPEDIENT Projects are expedited because the bid process has been completed, which streamlines the typically lengthy procurement process. Often, projects can begin in as little as 30 days, as compared to typical 90-120 day start up times.

IT'S CONVENIENT You can deal with a single source for all phases of your project, including discovery, programming, design, construction and commissioning. Through the E&I contract, Tremco/WTI provides turnkey options where we will assume complete responsibility for your construction project's development, execution and follow-up.

IT'S BUDGET-FRIENDLY The contract features installed line item pricing which includes labor and materials for guaranteed budget predictability. You can also choose discounted materials only.

IT'S QUALITY-BASED Only proven and experienced local contractors and subcontractors who have been evaluated on compliance, capability and experience will work on your project.

Northern Kentucky University

Roofing, Building Envelope + Construction Services

Your Goals. Our High Performance Building Solutions.

We've worked with higher education institutions and public entities across the country for decades. We understand your needs, and operational and budget challenges. Which is why we continually advance our own capabilities to deliver a suite of solutions as customizable as they are turnkey.

Here's a snapshot of our total capabilities available through the E&I Contract.

PRODUCT INNOVATION engineered for greater long-term performance, reduced environmental impact, ease of application and lower labor costs. Our focus on sustainability is evident in new restoration products that eliminate the need for roof tear-off, while decreasing annual building energy use and enabling the acquisition of LEED® certification points.

TURNKEY ROOFING SERVICES represent our proactive approach to preserve your healthy roofs and bring the others up to standard. It's all about extending roof life via advanced diagnostics, early intervention, timely maintenance and repair.

TREMCARE® AND TREMCO MANAGEDASSETS™, provided by WTI, offer a range of customized, proactive roof maintenance and management programs designed to extend system performance and building lifecycles. In addition to regularly scheduled inspections, housekeeping and maintenance, our advanced options include expert inventory assessment, prioritized construction services and a leak-free guarantee.

HIGH PERFORMANCE BUILDING SOLUTIONS make facilities safe, healthy, comfortable, and efficient. A whole building retrofit examines a wide range of building elements to transform the energy efficiency, cost of operation, indoor air quality and environmental impact ... all while delivering an attractive financial payback.

SUSTAINABILITY is an essential part of our history. Enhancing water conservation, reducing energy use, and landfill avoidance are among our top priorities today.

BUILDING ENVELOPE AIR SEALING by affiliate Canam Building Envelope Specialists* uses precise testing methods to identify gaps, cracks and holes in the building envelope as the first step toward improving building performance. Eliminating air leaks can improve general safety and comfort, protect vital building components, and greatly reduce energy consumption.

INDOOR AIR QUALITY is essential for building occupant safety and health. Through our WTI/Pure Air Control Services™* solutions, we can help you improve IAQ through environmental consulting, building diagnostics, and laboratory services, as well as HVAC system hygienic cleaning, sanitizing and remediation.

* Part of Tremco Construction Products Group.

TREMCO CONTRACTORS available locally nationwide meet our standards for excellence in application of our products, safety performance and financial stability. Many of these companies have worked with us for decades and take advantage of Tremco's ongoing technical training program.

THE NATIONAL COOPERATIVE CONTRACTOR NETWORK provides public entities the ability to award roofing and building envelope projects to local contractors who qualify under the competitively solicited and publicly awarded contract.

PAVING AND PARKING GARAGE SOLUTIONS feature high-performance products to repair, maintain, restore, or resurface exterior surfaces through turnkey general contracting for all your concrete and asphalt project needs. Services include concrete patching and repair, asphalt sealing and paving, complete parking garage restoration, tile and terrazzo rehabilitation/restoration, and more. Flooring options from sister company Stonhard meet the need for chemical-, abrasion- and impact-resistant systems for highly trafficked exterior parking garages, exterior plaza decks, and more.

INSULATED EXTERIOR CLADDING SYSTEMS from Dryvit* range from stucco, limestone and granite to metal, brick, and woodgrain finish options, for a beautiful and high performing air and weather barrier.

WINDOW SYSTEMS, REPAIR AND SEALANTS solutions are designed to achieve airtight transitions from windows to the wall, and to meet high performance energy standards throughout the building exterior.

GENERAL CONTRACTING SERVICES, provided by WTI, consist of construction project management from the bid process through completion, including daily on-site supervision. It's a single source solution with a proven record of excellence and centralized accountability.

Work With Your Preferred Contractors Enrolled In The National Cooperative Contractor Network

Together with E&I Cooperative Services, Tremco is pleased to offer participants the unique ability to work compliantly with their preferred roofing and weatherization contractors regardless of project size.

The National Cooperative Contractor Network Program gives schools and public entities the ability to award work to pre-approved, in-network contractors who meet a range of qualifications, including quality, past performance, financial stability, safety and insurance requirements.

Because the contract has been competitively solicited and publicly awarded, typical project cycle times can be dramatically reduced. And because local contractors can apply to become an In-Network Contractor at any time, public agencies with strong local relationships can continue to work with their preferred prime contractors.

Competitive, Transparent and Expedient

Designed to streamline construction projects while ensuring transparency and quality, the National Cooperative Contractor Network Program eliminates the need for “equal to” specifications that may result in inferior products and installation by an unqualified contractor because an open bid process was required. In-Network Contractors are prequalified and follow the competitive pricing offered through the E&I Contract.

As the Program Administrator, Tremco assumes responsibility for contractor enrollment and the management of this contract. Our goal is to ensure our public customers have direct access to the quality contractors of their choosing, with the added assurance that the procurement process meets all state procurement laws and regulations as applicable.

So, if you’d like to award more work to a local contractor with a strong performance record, ask if they’re a member of the National Cooperative Contractor Network. If they’re not, encourage them to apply by emailing nccadministrator@tremcoinc.com.

High performing students need high performance buildings

→ One Contract *Many Options*

The flexibility to procure just what you need when you need it.

MATERIALS ONLY

Choose from the complete line of Tremco's performance-engineered restoration, replacement, repair and maintenance materials.

CONSTRUCTION MANAGEMENT SERVICES

Outsource roofing and building envelope project management to WTI experts. From budgeting and scheduling to quality control and on-site supervision, WTI provides daily project management.

ROOF MANAGEMENT

TremCare® and TREMCO MANAGEDASSETS™ are customized roof and building envelope programs that provide the information and services you need to manage your assets for maximum performance and ROI.

COMPLETE BUILDING ENVELOPE

Services include façade cladding and restoration, building weatherization, window replacement, air barrier sealing, building ventilation system cleaning and sanitizing, asphalt paving, flooring, and parking garage restoration.

GENERAL CONTRACTING SERVICES

WTI specializes in integrated repair, restoration and retrofit services to improve building performance and lifecycle costs. With a whole building approach, our goal is to make change orders an exception—and to keep projects on time and on budget.

NATIONAL COOPERATIVE CONTRACTOR NETWORK

Administered by Tremco, this program gives E&I participants the ability to work compliantly with their preferred roofing and weatherization contractors who meet performance and other criteria to ensure quality.

There are so many ways to get exactly what you need through the E&I Tremco/WTI contract.

Our approach empowers you to choose the materials and services you require—and nothing more. We've made it easy to procure world-class products and expertise with all the advantages of a compliant, pre-competed contract.
